

Welcome to ePRI4ALL

The **ePRI4ALL** Project - **Open and digital resources for primary school principals to support inclusive education through online learning** started officially on February 1st, 2022, followed by a Kick-off meeting held in Almeria on May 12th. The project began with the Result 1, the elaboration of the methodology and the specification of Learning Outcomes, through interviews to primary schools principals and experts on the subject.

Interviews to principals and experts

For Result 1 data collection, a total of 99 in-depth semi-structured interviews were conducted in the four partner countries of the consortium (Spain, Italy, Greece and Poland). Most of them were conducted via videoconferencing while some took place face to face. A total of 38 experts including scholars, researchers, ICT trainers, teachers and national and regional programme coordinators were interviewed, as well as 61 primary school principals from different contexts.

Result 1 and Learning Outcomes

Because of the shortage of specific training in digital skills, inclusion and interculturality in order to prepare access to the position of head of school or principal, and because of what the COVID-19 pandemic taught us, it is necessary the:

Acknowledging and embracing the potential of digital technology as means to improve effective and inclusive learning.

Developing and promoting the Digital Intelligence.

Leading the way: developing a shared vision and goals involving the school community.

Planning for action: thinking about practice and mapping the journey.

Upcoming results

Last March, the consortium began designing Result 2. It consists of the elaboration of the Open Educational Resources (OERs). Innovative materials in slide format, case studies, self-assessment questions, which will be compiled in a digital manual in online format, free and open. Next June, it is also expected to complete the four modules of the OERs, which will be about:

1. Inclusive digital learning
2. Promoting digital intelligence in the primary school community
3. Digital learning leadership for the primary school community
4. Accessing and maintaining digital infrastructure for all.

About e-PRI4ALL

The ePRI4ALL —Project *Open and digital resources for primary school principals to support inclusive education through online learning*— The project arose in the context of the COVID-19 pandemic with schools closed for long periods of time, when distance learning had to be addressed. The project aims to implement an innovative program to guide the pedagogical development and digital competencies of primary school principals, with a special focus on vulnerable students.
